-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 10-19 are rejected under 35 U.S.C. 102(b) as being anticipated by LUC (US 4,144,110).

Luc discloses the method of processing metal members, comprising the steps of placing a pair of rotors opposite to each other, wherein the rotor having a concave portion, pressing each rotor in a respective central axis direction, the rotor being rotate against the surface of the lapped portions of the metal members, thereby forming a non-molten stirred layer, and locally joining the lapped portions. The stirring inherently results in an unevenness or wavy portion differing in height in a circumferential direction of the respective rotor on each of the tip portions. In addition, the burrs will be inherently removed by the rotors due to the circumferential force of the rotors (figures and col. 13, lines 47-55).

Response to Arguments

3. Applicant's arguments filed 10/20/03 have been fully considered but they are not persuasive.

Applicant argues that the new claimed features, "the lapped portions being respectively located on the tips of the rotors including the concave portions", are not disclosed by Luc. Examiner respectfully disagrees, since col. 13, lines 47-55, discloses the claimed invention. Therefore, claims 10-19 remain rejected.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
